RESPONSE

Hon. Commissioner for Patents
Washington, D.C. 20231

Sir:

Responsive to the office action of October 23, 2002, Applicant requests
reconsideration of the application in view of the remarks presented herein.

The claims in the application are claims 1 to 7, no other claims having been
presented.

The Examiner has objected to the amendments to the specification as being drawn
to new matter since, in the Examiner's opinion, there is no support in the disclosure for
the added material, with respect to that of quarter circle cross section for the "balls 3" but
the Examiner believes that the specification and drawings do not describe this feature and
that the drawings submitted with the last response are drawn to a different invention. The
Examiner has accepted "α to be about 15°" as being supported.
